MEHDI REZAKHANI

PROFILE

I'm a Front-End Developer with about 2 years of experience and I'm familiar with most of the necessary libraries. I also created projects such as online-shop and crypto for personal learning. I'm able to quickly grasp new concepts. I love coding websites and most of the time I do it as a hobby. I look forward to learning new stuff and being the best version of myself as a Developer. I'm not afraid of errors and bugs and actually, they are the fun part of coding. I like the nice feeling and excitement after solving them.
